vivapark

Porto Belo

You feel like
it's meant
for you.

 VOKKAN

The first neighborhood park in Brazil.

Vivapark combines its extensive residential area with a complete infrastructure for education, work, shopping, leisure, culture, and well-being.

Day-to-day convenience is ensured by proximity and super-technological infrastructure. Quality of life is enhanced by direct contact with nature, with its 138,000 m² of green area, including two large parks with lakes, walkways, and five plazas equipped for sports and leisure. Perfect environments to relax and contemplate the grandeur of this paradise.

vivapark
Porto Belo

Vivapark is the only real estate development in the world to receive the LEED Platinum certification in the Community Planning and Design category.

A close-up portrait of Jaime Lerner, an elderly man with white hair and blue eyes, wearing a dark blue t-shirt. He is looking directly at the camera with a slight smile. The background is blurred, showing green foliage and warm, out-of-focus lights.

Urban design by Jaime Lerner

“Vivapark is an invitation to live this space, to live well, where sustainability and interactions between people are properly done.”

Jaime Lerner

The world-renowned architect and urban planner **Jaime Lerner**, chosen as the second-best urban planner in the world by Planetizen magazine, brought his famous concept to **Vivapark Porto Belo**, which idealizes the perfect urban space as the shell of a turtle. Apart from visually resembling the design of an urban fabric, where each part is connected to the other, the animal's protection is the best representation of sustainability: life, work, and accommodation in one place. This is also how our neighborhood park functions.

Porto Belo The paradise of the Brazilian coast

Vivapark is located in the city of Porto Belo, a paradise on the coast of Santa Catarina, Brazil. Surrounded by beautiful beaches and the Atlantic Forest, the city is part of a strategic region for tourism, as well as an ideal place to live well.

Porto Belo is only 72 kilometers from Florianópolis, the state capital, with easy access to the main airports in the region. A truly unique city, perfect for an innovative ecosystem like Vivapark Porto Belo.

vista Jardins

Residential Building

Apartments from 117 m² to 684 m²;

Double-height ceilings of 6 meters;

3,000 m² of leisure area;

Security

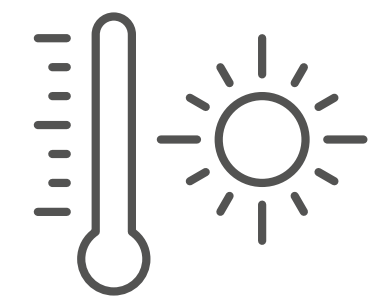

Digital Enclosure without Walls

Virtual fences and high-definition thermal cameras replace the walls in Vivapark Porto Belo.

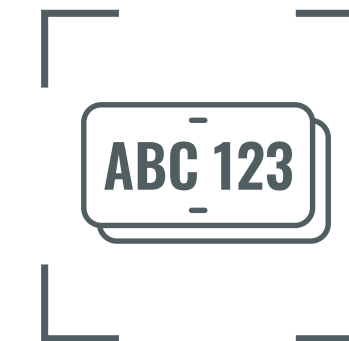

Bollards

Retractable traffic barriers are automatically activated to control vehicle entries and exits.

24/7 Analytical Systems

Intelligent systems that make decisions based on images captured by thermal cameras.

Vehicle Recognition

The system performs license plate recognition and determines the type of vehicle circulating in the neighborhood park.

Facial Recognition

With a focus on smarter and more automated operations, the system ensures comfort and security for everyone.

Security Totems

Residents and visitors benefit from the connectivity of security totems distributed throughout the development.

Infrastructure

Vivapark will feature 100% underground cabling. This technology guarantees greater energy efficiency and high stability in data transmission, while eliminating visual pollution and providing unparalleled aesthetic benefits. Additionally, fiber optics will be installed all throughout the neighborhood park.

- **100% Underground Cabling**
- **Less visual pollution**
- **Reduced risk of accidents**
- **Lower maintenance costs**
- **Transmission stability**
- **Greater energy efficiency**
- **Increased property value**

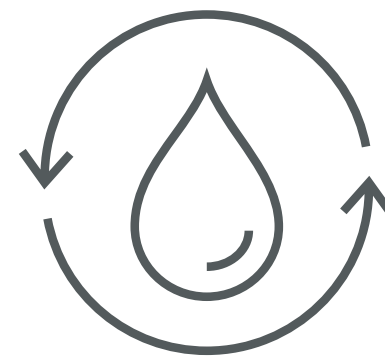

Sustainability

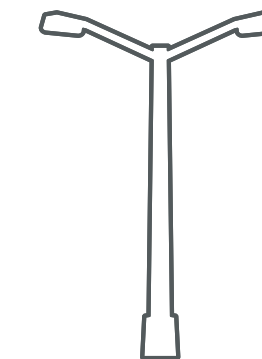

Wastewater Treatment Plant (WWTP)

The WWTP will utilize aerobic technology, specifically the Moving Bed Biofilm Reactor (MBBR), to ensure odor-free operations and achieve high treatment efficiency.

Drainage Network with HDPE Pipes

HDPE pipes have high resistance to external loads and abrasion, offering excellent hydraulic performance. Additionally, they do not contaminate groundwater or the environment.

LED Lighting

The streets, plazas, parks, and parking lots of the neighborhood park will feature exclusively LED lighting, ensuring high energy efficiency.

Bom Jesus School

One of the most prestigious educational institutions in Brazil, Bom Jesus School, arrives at Vivapark Porto Belo to offer comprehensive education just minutes from home.

With over 120 years of history and more than 30 units across the country, the school is known for its education based on Franciscan principles and a humanistic approach, perfectly aligning with our neighborhood park's concept.

- **Early Childhood Education**
- **Primary Education**
- **Secondary Education**
- **Bilingual Program**
